DETAILED ACTION

1. Applicant's after-final amendment of June 15, 2007 has been fully and carefully considered and has been entered and the application is now in condition for allowance.
2. The following is an examiner's statement of reasons for allowance: The invention relates to a novel multi-catalyst injection system and method of using the multi-injection system with a FCC reactor comprising a vessel configured to deliver catalyst to an FCC unit, a separator disposed in the vessel defining at least two compartment within the vessel and a plenum defined in the vessel coupled to each compartment wherein the plenum is pressurizable and a plurality of dispense mechanisms each dispense mechanism is coupled to a respective compartment in the separator. The prior art fails to teach an applicant's pressurizable plenum coupled to each compartment, and further fails to teach and/or suggest that the separator is coupled to a bottom of the vessel and extending to an elevation short of the top of the vessel as claimed. The construction and arrangement of the multi-catalyst injection system comprising a vessel having at least two compartments which stores catalyst which is coupled to a respective dispense mechanism permits independent control of flow of the catalyst from each compartment of the injection system which has not been taught or fairly suggested either singularly or in combination by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
